### **PRICE LIST FORMAT**

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the price list. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its price list approval process, the most current page number on file with the Commission is not always the price list page in effect. Consult the check sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
  - 2.1
  - 2.1.1
  - 2.1.1(A)
  - 2.1.1(A)(1)
  - 2.1.1(A)(1)(a)
  - 2.1.1(A)(1)(a)(1)
- D. Check Sheet** - When a price list filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the pages contained in the price list, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There shall be no other symbols used on this page if these are the only changes made to it. The price list user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.
